

## PRESCRIPTION CARD AVAILABLE BY TEXT MESSAGE

Ensuring the injured worker receives their approved medications immediately following their injury is key to effective management of any workers' compensation claim. Receiving approved medications from the beginning of the claim will benefit everyone:

- Direct notification of injury occurrence and medication authorization
- Mitigating potential high-risk, high cost situations
- Preventing costly out of network invoices
- Ensuring Carlisle Medical pharmacy discounts are applied on every medication fill
- Elimination of potential out-of-pocket expense for the injured worker

Carlisle Medical now supports the injured worker receiving their Prescription Card via Text message. This secure, opt-in function will allow a quicker and more efficient method for the injured worker to obtain any approved medications related to their injury. Let the Carlisle Medical team know if you want your program to start this service for your injured workers.

## CORRESPONDENCE WITH INJURED WORKERS VIA TEXT

## How Do I Text a Card?

When accessing any of your claimant's information and data on Carlisle Medical's online portal, CONNECT, simply click the link, "SMS Rx Card". This link is on the main Patient Injury screen of each individual claimant. The "SMS Rx Card" link is conveniently located next to the link "Email Rx Card" to ensure all of the contact options are easily available.
